

ASIS Primary

- Information Technology is an important and integrated part of our curriculum.
- Language, Mathematics, Science and other subject weeks – where languages, inventions, innovations and projects take centre stage.
- Physical and Health Education at ASIS are a critical and fun part of knowing oneself as a healthy learner in body and mind.
- Learning Journeys see learners of all ages leave the campus (at times virtually) to experience different hands-on learning, including working with local communities
- Homeroom is a time each day where learners and their teachers share ideas, concerns, questions about learning and life.
- School Events may include UN Day, Independence Day, charity bazaars, sports days and inter-school competitions to give our learners more opportunity to develop as whole learners.
- The SIS Olympics are annual gatherings of all SIS schools culminating in a three-day sporting event where SIS learners participate and compete.
- Co-Curricular Activities (CCAs) offer learners a chance to opt for a wide range of after-school activities run by teachers, external professionals and by learners themselves (with supervision).
- The Inter-Disciplinary Project (IDP) is a project-based learning activity that provides opportunity for learners to develop themselves and learn to connect and go beyond the boundaries of their usual subjects.

ASIS Primary School

Learning and developing during the formative primary years are vital for your child. It is at this time that a high-quality primary education is needed to ensure the best development of cognitive, social, emotional and cultural skills.

The ASIS Primary programme focuses on the development of the learner within the context of our areas of knowledge such as Mathematics, Sciences, Languages, Music, Sports and Creative Arts.

The ASIS programme revolves around developing the whole child for life, work and school through our PACE initiative:

Perseverance:

We help our learners to understand adversity and to persevere. We guide and coach them closely in their journey towards their own goals.

Analytical Thinking:

ASIS Learners are taught to analyse before solving problems. They test predictions and generate solutions. They learn to plan, prioritize and take action.

Communication and Collaboration:

These, along with trust, are explicitly maintained at high levels throughout our community. Learners are given opportunities to learn in teams. They explicitly learn how to communicate and collaborate effectively.

Entrepreneurism:

Our learners will be encouraged, guided, coached to develop an entrepreneurial spirit along with the skills and dispositions needed to identify, create and make the best of opportunity around them.

At ASIS, learning and developing as a learner is all about inspiring young people. We don't just teach here. Instead we, mentor, coach, stimulate, and engage in an integral, holistic nurturing environment.

“

Parents and learners see SIS Schools as more than 'schools'. They see them as learning communities, friends, philosophers and guides – a testimony to our tradition of providing care and quality education

”

The SIS Group of Schools

The history of the SIS Group of Schools traces back to 1996 and is deeply rooted in the mission of its founder Jaspal Sidhu, which is to bring quality and affordable education to different income levels through world-class schools established in major cities around the world.

It was no surprise that the Founder turned to his home country, Singapore, renowned for its education system, for inspiration. To ensure a solid foundation to the start of the first SIS campus, the cooperation of the Founder's Alma mater, Raffles Institution (Singapore's premier school) was secured. Further encouraged by members of the Singapore Government, and senior members of the Ministry of Education back then, the first Singapore International School of the SIS Group was established in Indonesia, the fourth most populous country in the world.

Today, SIS is in a very prestigious partnership with the International Finance Corporation (World Bank) to expand across many geographies throughout the world.

The success of all SIS Schools comes from their focus on the three 'P's of a good school: People, Programme, and Place. Outstanding learning communities and environments created by our 'People'. World-class 'Programmes' that prepare young people for their lives. Campuses that are green, pleasant and inspiring mark our 'Place'

Our Educators

- Highly qualified and experienced
- Passionate, Inspiring and Observant
- Communicative and Warm
- Collaborative

Holistic Assessments

Each child comes with their own personality and learning curve. ASIS subscribes to the holistic assessment of each child thus building the desire to learn and grow. This includes informal avenues like continuous monitoring, informal interactions, parent participation along with formal assessments such as Score Tracking, Report Files, Semestral Examinations and International Bench-marking.

Academic Support Programme

For learners who are still developing towards the expectations of a subject area, ASIS has an Academic Support Programme, where teachers will give individual support and attention to the learner, outside curriculum time. Along with the differentiation within classes, this allows them personalized attention and the ability to progress towards goals in an encouraging, non-pressurized environment.

Parents and Schools as Partners

Parents, along with our learners and all employees of the school, are seen as vital members of our learning community. We encourage parents to provide feedback on our learners' experiences whether they be academic, social or emotional. This steady interaction with parents forms the backbone of our educational experience to ensure that learners always have fun learning whether in school or at home.

There's More to the ASIS Primary Programme

- Learning regional languages - learners will be multilingual with exposure to several regional languages. Please discuss with us for language preferences.
- Music and Creative Arts - Exposure to local and regional music, instruments and arts as well as starting on the path to mastering art in a variety of media.
